Section 1. INTRODUCTION

The Bachelor of Science in Information Technology (BSIT) program prepares students to be IT professionals, be well versed on utilization of both hardware and software technologies involving planning, installing, customizing, operating, managing and administering and maintaining information technology infrastructure that provides computing solutions to address the needs of the organization (CHED CMO 25 s. 2015). **Capstone project is required for the BSIT program.** The skills, methods and theories learned by the students in their stay in the BSIT program are applied in this output- oriented course.

This is a very special course in the BSIT program. Students do it starting in the second semester of their third year of studies until the first semester of their final year and it is their opportunity to demonstrate that they can indeed meet the levels of performance expected of an IT professional. The Capstone Project includes project proposal, feasibility studies, intellectual property, teamwork, budget, schedule, management, professional communications (i.e. reports, presentations), planning, design, implementation, deployment, and testing. Students will be expected to do much more than "get something working". They will be expected to meet a number of strictly enforced milestones and to take considerable initiative in realizing specific goals. Moreover, the Capstone Project is a way of determining whether or not students are ready to graduate.

The Capstone Project has a number of educational objectives. Although each Capstone Project is different and the relative emphasis will vary, the subject will involve students in:

- Bringing together and integrating knowledge and skills in the course as a whole;
- Reinforcing and developing competencies that have not been sufficiently emphasized in the fundamental subjects;
- Defining a substantial, comprehensive study or design-related study and carrying it to completion within a specified time and to a professional standard;
- Completing a comprehensive written and bound report that places the Research / Capstone Project in context, defines its objectives, and describes the work done with the resulting conclusions or recommendations;
- Bridging the gap between the undergraduate studies and the professional future, and demonstrating professional competencies and capabilities;
- Demonstrating initiative and creativity, taking pride in the achievement of a difficult task.

Through this course, students are prepared in their respective careers. The bulk of the work (i.e., the Capstone Project work itself) is to be done outside of the classroom.

Section 2. DEFINITION OF TERMS

The following are the operational definition of the terms frequently used in this guideline:

Capstone Adviser – A full-time faculty member of the department who guides the researchers/proponents.

Capstone Project – student's output in their Capstone Project and Research Class.

Client – beneficiary of the capstone project.

Researcher/Proponent – Students that are currently undertaking Capstone Project and Research class.

Startup Project - a capstone project that is an innovative IT-based product, system, or platform with the potential for commercialization, scalability, or real-world deployment.

Section 3. CAPSTONE PROJECT AGENDA

The Capstone Project agenda/thrust of the Information Technology Department which is anchored on the University's Research Agenda Framework generally focuses on contributing to the Sustainable Development Goals which includes but not limited to the following:

- Business and Industry Development
- Business Studies
- Industry Studies or Ancillary Studies
- Spatial Studies
- Socioeconomic Development Component
- Education Studies
- Poverty Alleviation and Reduction of Income Inequality
- Addressing Urban-Industrial Spatial Imbalances
- Promoting a Globally-Competitive Service Sector in Mindanao

Section 4. CAPSTONE PROJECT SUGGESTED AREAS

The Capstone Project must be useful to any establishment of the same nature or scope. It must not exist or have been proposed by previous Proponents/Researchers. The Capstone Project must not be developed using the off-the-shelf application programs. In consideration of CMO 25 s. 2015, the proposed computerized system may fall in any of the following categories, but not limited to:

Software Development

- Software Customization (most especially Free and Open Source Software)

- IS Development for an Actual Client (with at least Alpha Testing with Live Servers)
- Web Applications Development (with at least Alpha Testing with Live Servers)
- Mobile Computing System

Multimedia Systems

- Game Development
- E-learning Systems
- Interactive Systems
- Information Kiosks

Computer Network

- Network Design and Implementation
- Server Farm Configuration and Management

IT Management

- IT Management
- IT Strategic Plan
- IT Security Analysis, Planning and

Implementation Other Topics (Integration)

- Data Mining
- Image Processing
- IoT

Section 5. CAPSTONE PROJECT MINIMUM REQUIREMENTS

- The project must be deployed a native mobile application either iOS or Android and a responsive web application to ensure broad accessibility.
- The system shall implement a multi-channel notification strategy, delivering real-time updates to user via both email and SMS.
- All data transmission must be protected using HTTPS(SSL/TLS) encryption to ensure end-to-end security and data integrity.
- A robust backup and recovery system must be established to prevent data loss and ensure high availability in the event of a system failure.

Section 6. CAPSTONE PROJECT GROUP/TEAM

Students should preferably work in teams/groups. If a student, by special circumstances, is unable to work with a group, the Chairperson may allow her/him to work alone, regardless of his academic standing. Multidisciplinary teams/groups are also encouraged, provided that the team/group members prepare separate documentations per program.

6.1. Composition

The Capstone team/group will be composed of at most four (4) students, all of whom have enrolled Capstone Courses and have formed the team/group starting from their Technopreneurship (ES211a) subject. The following are the four roles that the proponents/researchers should play:

- **Lead Researcher** - The person with authority to manage a Capstone Project. This includes leading the planning and the development of all Capstone Project deliverables. The lead researcher is responsible for the budget, work plan and all Project Management Procedures (scope management, issues management, risk management, etc.).
- **Systems Analyst –** the person who checks that all parts of the system are coordinated.
- **Programmer/s** - The persons who design, write, and test computer programs.
- **Documenter/Technical Documenter** - A person who writes the Capstone Project study document, both the system and the Capstone Project manuscript

6.2. Policy on Disbanding and Re-grouping

Authority and Initial Action

Any intention to disband a capstone team shall be formally reported to the Department Chairperson. The Chairperson, in coordination with the Capstone Adviser, shall convene the team to determine based on valid and documented ground, whether the issue can be resolved amicably or if disbanding is warranted.

Period When Disbanding Is Allowed

Disbanding of capstone teams shall be allowed only before the Project Proposal in Capstone Project and Research 1 (IT321).

No disbanding shall be permitted after the approval of the project proposal and during Capstone Project and Research 2 (IT411).

Maximum Team Size

Each capstone team shall consist of a maximum of four (4) members.

In cases where a team formed during the Technopreneurship subject exceeds four (4) members, the Department Chairperson shall require the group to be divided into teams of no more than four (4) members prior to Capstone 1 enrollment.

Options for Disbanded Teams

A disbanded team or a subset of its members may take only one of the following actions:

a. **Continue the Approved Proposal**
   A subset of the original team may request approval from the panel to continue the previously developed proposal, provided they can demonstrate the capacity to complete all requirements. Only one subset shall be allowed to continue the original proposal, preferably the group that made the most substantial contribution to the project.
b. **Submit a New Proposal**
   The newly formed team shall develop and present a new capstone proposal, and a new Concept Proposal defense shall be scheduled.
c. **Join Another Capstone Team**
   A disbanded member may join another team subject to the following conditions:
   - The transfer must occur before enrollment in Capstone 1 (IT321).
   - A written agreement shall be executed stating that the new team shall no longer disband.
   - The resulting team shall not exceed four (4) members.
   - The team may retain or select a new Capstone Adviser, subject to approval.

Probationary Period for Transferring Members

Any student who joins another capstone team after disbanding shall undergo a one-month probationary period, during which the adviser shall evaluate the student's commitment and contribution.

Students Who Temporarily Stop Schooling

If a student temporarily stops schooling and the capstone project is successfully defended by the remaining members, the returning student shall be required to propose a new capstone title or join a team that has not yet presented a Concept Proposal.

Time Limit for Completion

Students are required to complete the Capstone Project within two (2) years from initial enrollment in Capstone Project and Research 1 (IT321).

If a team fails to complete the project within this period and the concept remains relevant, the Department may allow another team to adopt the title. The original team shall be required to select a new title and re-enroll in Capstone Project and Research 1 (IT321).

Section 7. CAPSTONE PROJECT ADVISER SELECTION

Eligibility of Capstone Adviser

Each capstone team shall be guided by one (1) Capstone Adviser who is a full-time faculty member of the BSIT Program. Preferably, the adviser shall be a master's degree holder. A faculty member with a bachelor's degree may be considered, provided that he or she possesses relevant expertise based on training, research, or professional experience.

Adviser Workload Limitation

A Capstone Adviser shall handle a maximum of four (4) capstone groups per semester, in accordance with departmental workload policies.

Adviser Expertise and Continuity

The assigned Capstone Adviser must have adequate knowledge and experience relevant to the project topic to provide appropriate academic and technical guidance. Once assigned, the adviser shall continue in this capacity for the duration of the project, provided that he or she remains a full-time faculty member of the Department.

Adviser Selection Process

- The Program Chairperson shall provide an official list of eligible Capstone Advisers, including their respective fields of specialization or expertise, at the start of the capstone course.
- Capstone teams are given the freedom to select an adviser from the approved list based on project relevance and adviser availability.
- Students must secure a Capstone Adviser prior to the Concept Proposal defense.

Adviser Acceptance and Approval

- Once an adviser agrees to guide a capstone team, the students shall accomplish an Adviser Acceptance Form, signed by the selected adviser.
- The accomplished form shall be submitted to the Program Chairperson and Academic Head for approval.
- Only teams with an approved Adviser Acceptance Form shall be allowed to proceed to the Concept Proposal.

Posting of Adviser Assignments

Upon completion of the adviser selection process, the official list of groupings with assigned advisers shall be finalized, posted, and disseminated to students and faculty by the Department.

Section 8. ORAL EXAMINATION PANEL COMPOSITION

The Oral Examination Panel is a group of qualified faculty members who suggests and recommends revisions if necessary and decides on the outcome of the defense and grade of the student. (Note 1: DPM- USTP-ACAD-012)

The panel is composed of 1 Chairman, 3 members, and may include content experts and documenter as assigned if necessary. The composition of the Capstone defense panel must be retained, as much as possible, throughout all the stages of the Capstone.

For Capstone 2, the Client of the Capstone Team/Group will sit-in as part of the Defense Panel during Final Defense. The Client will validate the process flow and will assure the members of the panel that he/she has check the output in accordance to the business processes that the output will reflect.

Section 9. DUTIES AND RESPONSIBILITIES

9.1. Researchers/Proponents

Compliance with Policies and Guidelines

- Researchers shall read, fully understand, and strictly comply with all Capstone Guidelines, departmental policies, and institutional regulations.

Awareness of Schedules and Deadlines

- Researchers shall keep themselves informed of all capstone schedules, activities, requirements, and deadlines issued by the Department, Capstone Adviser, and Program Chairperson.

Consultation and Progress Reporting

Researchers shall:

- Attend regular consultations with the Capstone Adviser;
- Failure to attend weekly consultations (3 consecutive or 5 instances) means Dropped with Failure.
- Submit weekly accomplishment reports to capstone project progress; and
- Promptly communicate concerns, issues, or difficulties encountered during project implementation.

Team Responsibility and Accountability

Researchers shall:

- Clearly define individual roles and responsibilities within the team;
- Ensure active and meaningful contribution to all major phases of the project; and
- Report any delinquent or non-performing member to the adviser in a timely manner.

Peer Evaluation

- Researchers shall participate in and submit peer evaluation reports as required by the Department to support individual accountability and fair assessment.

Proposal, Defense, and Presentation

Researchers shall:

- Prepare and present the Concept Proposal, Project Proposal, and Final Defense;
- Ensure that all group members are present and participate during oral examinations, unless officially excused by the Capstone Committee; and
- Follow the prescribed dress code: Corporate Business Attire
- Secure all required panel approvals for each project milestone.
- Failure to attend the Defense Presentations without valid reason shall automatically be marked FAILED in the subject.

Documentation and Submission of Requirements

Researchers shall:

- Submit all required documents, reports, and system outputs on or before the prescribed deadlines;
- Ensure that the final manuscript is complete, proofread, and compliant with approved templates and formatting standards; and
- Acknowledge that failure to meet deadlines shall not be attributed to the adviser, Program Chairperson, or the University.

Panel Review and Document Tracking

- When documents are submitted for panel review, researchers shall secure acknowledgment of receipt. Panel members shall be given up to three (3) working days to review submissions, and documents may only be retrieved upon completion of the review period or earlier if released.

Client and External Stakeholder Coordination

Researchers shall:

- Coordinate with the identified client or end-user; and
- Ensure the presence or representation of the client during proposal and final defense, whenever required.

Ethical Conduct and Academic Integrity

Researchers shall:

- Observe ethical standards, proper citation, and originality in all outputs;
- Use external sources only for reference and validation, and not copy or replicate existing projects in whole.

- Process the AI and Plagiarism Checker. The accepted plagiarism/AI percentage is less than or equal to 15%.

Training and Professional Development

- Researchers shall attend research seminars, workshops, or training activities organized by the Department or approved external institutions, when required.
- Failure to attend will result to a consequence.

Adviser Evaluation and Agreements

Researchers shall:

- Accomplish the adviser evaluation as part of course requirements; and
- Sign the Capstone Guidelines Acknowledgement Sheet.

Sanctions and Non-Compliance

- A capstone member who is consistently delinquent, fails to contribute, or violates project policies may receive a FAILED remark, subject to evaluation and decision of the Capstone Panel and Department.

9.2. Capstone Adviser

Project Relevance and Compliance

- Ensure that the proposed capstone project conforms to the academic standards, policies, and research thrusts of the Department and the University.

Academic and Technical Guidance

Provide continuous guidance to student researchers throughout the project, particularly in:

- Defining clear and measurable project objectives;
- Identifying appropriate methodologies, tools, and system designs; and
- Ensuring technical soundness and feasibility of the proposed solution.

Consultation and Progress Monitoring

- Conduct regular weekly meetings with capstone advisees to monitor progress, address issues, and provide formative feedback. The adviser may require the submission of weekly accomplishment reports or other progress documentation.

Review and Approval of Deliverables

- Thoroughly review all project deliverables and require necessary revisions to ensure compliance with department-approved templates, quality standards, and timelines.

Readiness for Defense

- Evaluate the preparedness of the capstone team and recommend students for Concept Proposal, Proposal Defense, and Final Defense only when requirements have been satisfactorily met. The adviser shall not endorse any defense if the team is not academically or technically ready.

Participation in Oral Defenses

- Be present during the Concept Proposal, Proposal Defense, and Final Defense, and provide clarifications, when necessary, without unduly influencing panel deliberations.
- If the adviser is not present, the proponents are not allowed to participate in the oral presentation.

Revision Monitoring and Finalization

- Ensure that all required panel recommendations and revisions are properly incorporated into the manuscript and system prior to final submission.

Assessment and Grading

- Participate in the evaluation and grading of the capstone project in accordance with approved departmental rubrics and assessment procedures.

Submission of Grades

- Submit collated and complete grades of advisees within the prescribed academic timelines.

9.3. Oral Examination Panelists

Chairman

- Brief the Proponents/Researchers about the Proposal Hearing and Oral Defense program during the actual Proposal Hearing and Oral Defense.
- Issue the verdict. The verdict is a unanimous decision among the three members of the Capstone Project Proposal Hearing and Oral Defense panel. Once issued, it is final and irrevocable.

Panel Members / Content Expert

- Validate the endorsement of the adviser. The panel serves as "Internal Auditors", putting some form of check and control on the kinds of Researches / Capstone Projects being approved by the College.
- Evaluate the deliverables.
- Recommend a verdict after a thorough consideration of the request of the adviser and/or the Proponents /Researchers.

Section 10. CURRICULUM TRACKING

The student must finish the following courses that prepare him/her to undergo a formal capstone project/research study:

IT 321 – Capstone Project and Research 1

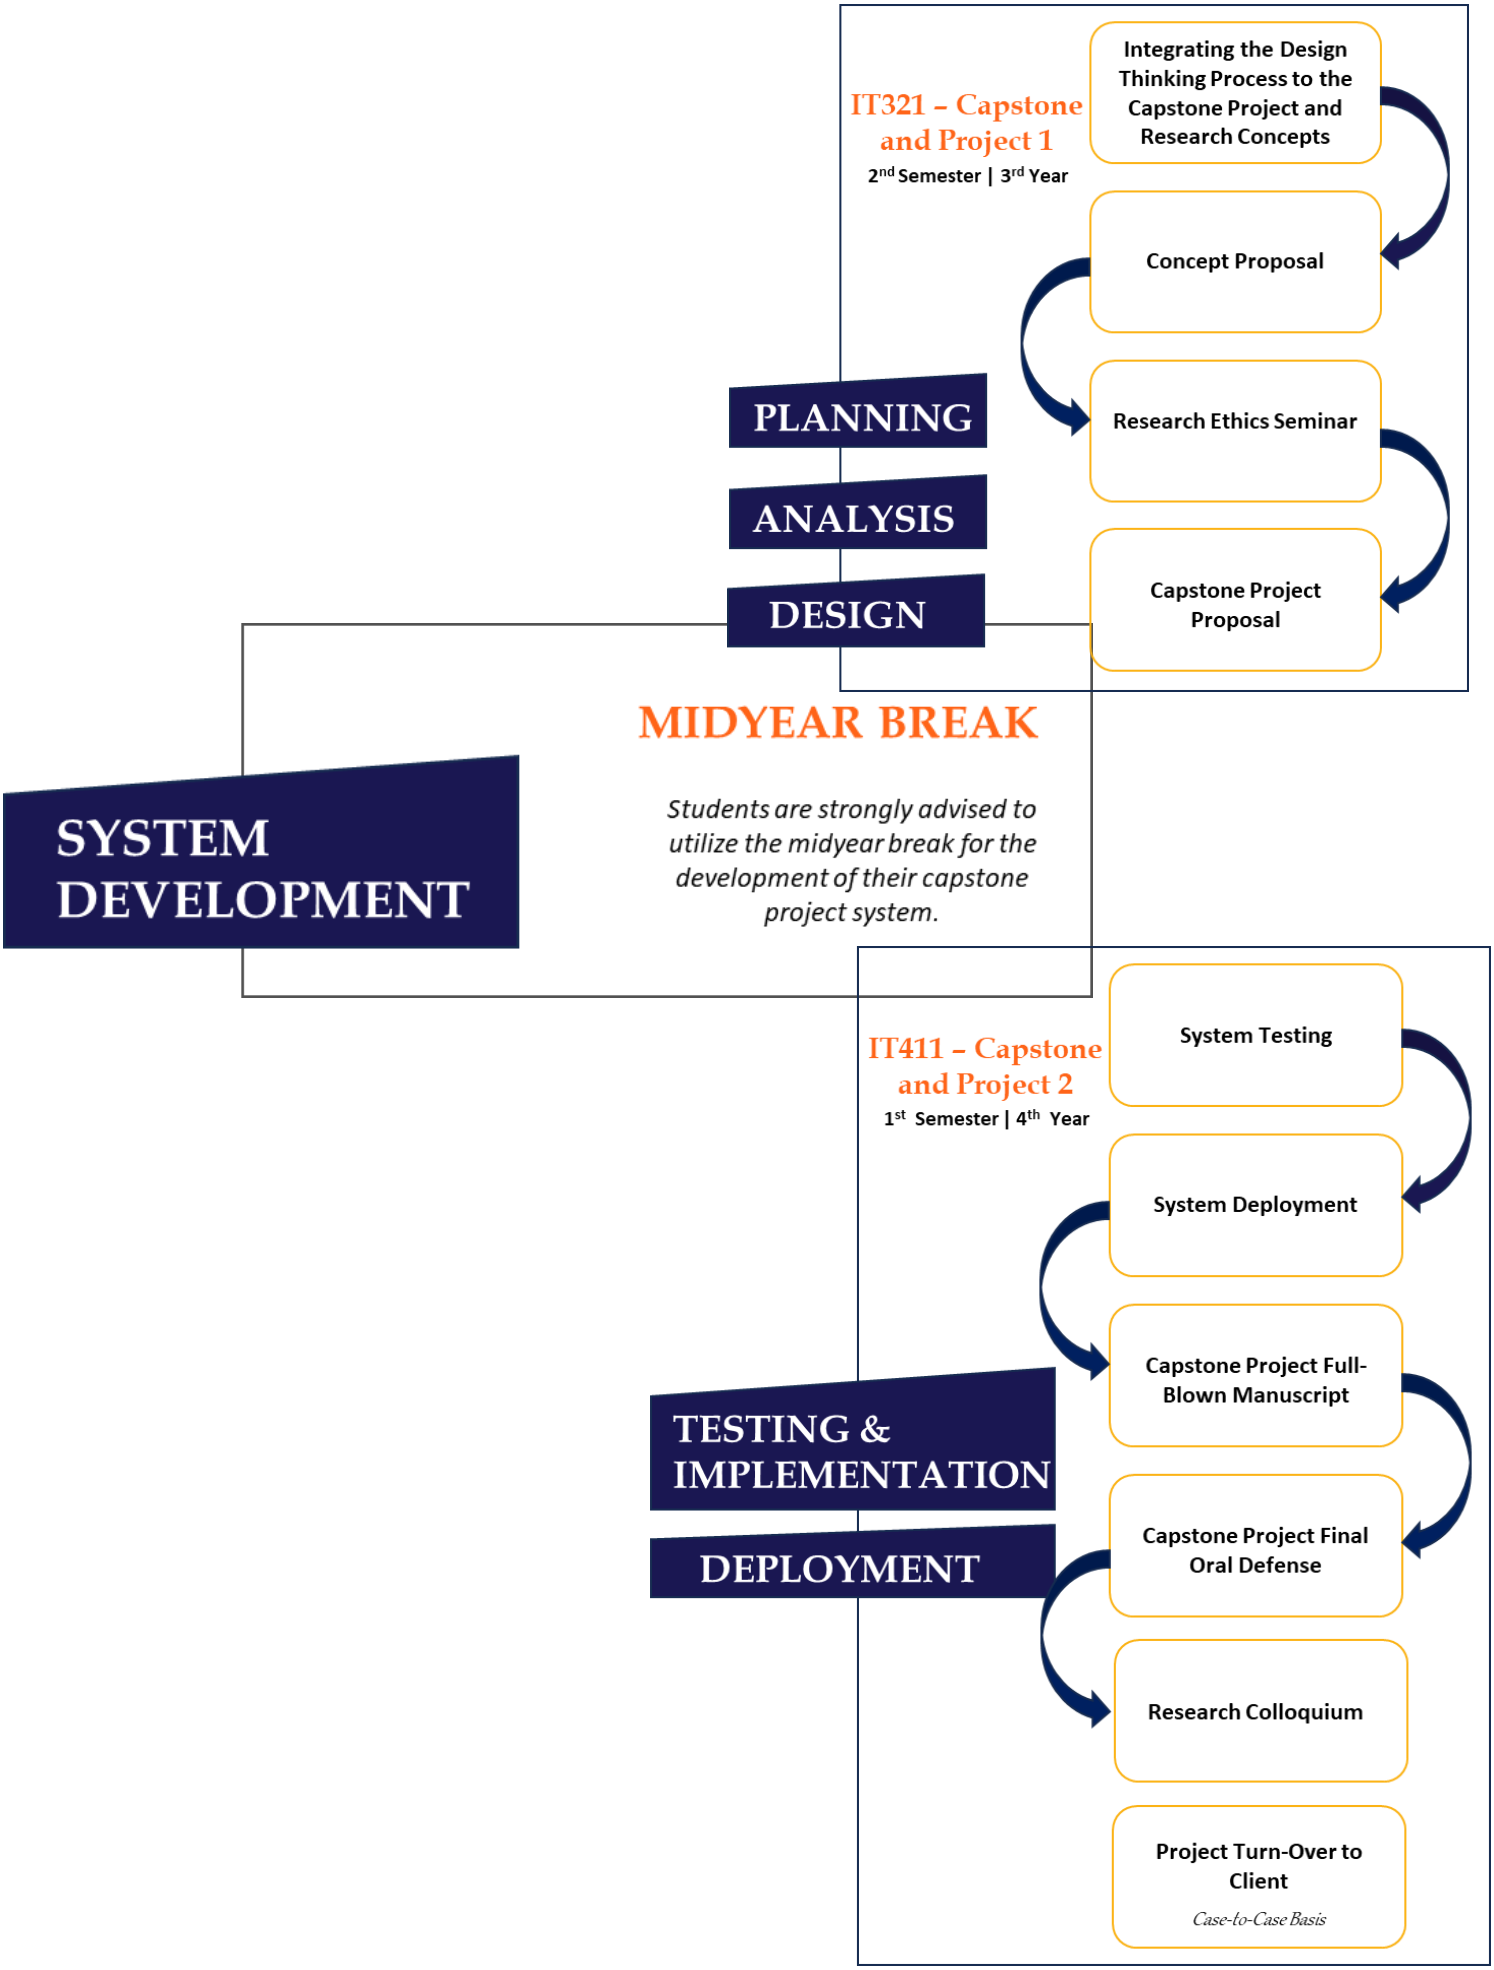

PRE-REQUISITES *(Should be taken and passed before enrolling IT321)*		
Course Code	**Descriptive Title**	**Remarks**
IT311	Information Assurance and Security	for development of the software
IT313	Mobile Programming	for mobile application related implementation
IT314	Software Engineering	for development paradigm
ES211a	Technopreneurship	for business related projects
CO-REQUISITES *(Should be enrolled together with IT321)*		
IT324	Quantitative Methods	for formal research writings and undertakings

IT 411 – Capstone Project and Research 2

PRE-REQUISITES *(Should be taken and passed before enrolling IT411)*		
Course Code	**Descriptive Title**	**Remarks**
IT321	Capstone Project and Research 1	for approved project proposal, system design, and research foundation
IT323	Applications Development and Emerging Technologies	for advanced system implementation and integration of emerging technologies
IT324	Quantitative Methods	for data analysis, system evaluation, and interpretation of results

Section 11. CAPSTONE PROJECT DURATION

The BSIT Capstone Project shall be completed within two semesters (IT321 and IT411), including the midyear period, with the following phases:

IT321 – Capstone and Project 1
2nd Semester | 3rd Year
Integrating the Design Thinking Process to the Capstone Project and Research Concepts
Concept Proposal
Research Ethics Seminar
Capstone Project Proposal
PLANNING
ANALYSIS
DESIGN
MIDYEAR BREAK
Students are strongly advised to utilize the midyear break for the development of their capstone project system.
SYSTEM DEVELOPMENT
IT411 – Capstone and Project 2
1st Semester | 4th Year
System Testing
System Deployment
Capstone Project Full-Blown Manuscript
Capstone Project Final Oral Defense
Research Colloquium
Project Turn-Over to Client
Case-to-Case Basis
TESTING & IMPLEMENTATION
DEPLOYMENT

Section 12. GRADING SYSTEM

The Final Grade of each proponent will comprise of the following:

Average grade of the Panel Members including the Chairman	50%
Adviser of the Research / Capstone Project / Group	30%
Co-Researcher (Peer Grading)	20%
TOTAL	**100%**

Panel Rating

The rating of each proponent per panel member shall be based on the rubric for objective evaluation purposes. (Refer to **Concept, Proposal and Final Rating Sheet**)

Adviser Rating

The rating/evaluation of the subject/adviser for each of the Proponents/Researchers shall be based on the following:

Subject/Adviser's Grade 30%	
Deliverables	**50**
Attendance	**30**
Attitude / Behavior	**20**

Section 13. CAPSTONE PROJECT MANUSCRIPT GUIDELINES

I. Organization of the Manuscript

The manuscript should be arranged in the following sequence:

A. Front Matters

Preliminary Pages	Page Number
Title Page	Page i, but number does not appear
Approval Sheet	Page ii, but number does not appear
Abstract	Begin numbering with iii
Dedication	Continue numbering
Acknowledgment	Continue numbering
Table of Contents	Continue numbering
List of Tables	Continue numbering
List of Figures	Continue numbering

B. Text

- The text is divided into chapters and sections.
- The first chapter begins with page number 1, in Arabic numerals, but unmarked.
- Except for the first page of each chapter which is not printed, all other pages are printed on the upper right-hand corner of the page (refer to margin settings under technical specifications).
- Each chapter must begin on a new page.

C. Back Matters

Pages	Page Number
Bibliography	Continue numbering in Arabic numerals following the text
Appendix/Appendices	Continue numbering
Curriculum Vitae	Continue numbering

II. Detailed Description of Each Section of the Manuscript

A. Front Matters

1. **Title Page**
   - This page contains five blocks of words, as follows: (1) the research title, (2) classification of research, i.e., thesis, etc. (uppercased), (3) College where the program belongs, University, City (4) Program of Study (Degree) and (5) Author and Date (Month and Year) of Publication (See attached SAMPLE: TITLE PAGE).
   - Block (2) is separated from block (3) by a single space. The remaining blocks are balanced within the page, with block (1) on the top line/s, and block (5) on the last two lines.
   - The title page is counted as page i (lower-cased Roman numeral), but unmarked. Pagination is reflected in the Table of Contents.
   - The research title should be in uppercase and centered. It should be presented in descriptive words that will ensure electronic retrieval.
   - The final line of the title page is the month and year in which the Thesis is submitted.

2. **Approval Sheet**
   - The purpose of the Approval Sheet is to enable the student's adviser, the members of the Oral Examination Panel, the Chair of the Department and the Dean of the College to indicate that the work satisfies the requirements of the degree.
   - Signatures of all members of the Oral Examination Panel, Chair of the Department and the Dean of the College are affixed. Dates for affixing the signatures are likewise indicated.
   - This is Roman page number ii, but unmarked. Pagination is reflected in the Table of Contents.
   - See attached SAMPLE: APPROVAL SHEET

3. **Abstract**
   - The heading for this page is **ABSTRACT** in uppercase and bold attributes, centered without punctuation. (See attached SAMPLE: ABSTRACT)
   - The body of the abstract, printed in double or one-and-one-half spaces, begins on the fourth line below the heading.
   - An abstract is a general overview of the research. It is a summary of the study; a statement of the experiment or problem, the procedure followed the results and the conclusions.
   - It should be a succinct account that allows readers to make an accurate decision as to whether the full contents will be beneficial to him/her.
   - The maximum length for a thesis abstract is 200 words.
   - Diagrams, charts and tables, or other illustrated materials and formulae or equations are not included in the abstract.

- Symbols, as well as foreign words and phrases, must be clearly and accurately displayed.
- Use present form in all sentence construction, if possible.

4. Dedication

- The heading of a one-paged DEDICATION need not appear on the dedication page, and the text may be centered.
- This contains names of special people, e.g., family and friends, who are close to the author and who have inspired him/her to completing the work.

5. Acknowledgement

- The word **ACKNOWLEDGEMENT** in uppercase and bold attribute should be centered.
- This page expresses the student's recognition of, and appreciation for, any special assistance made by individuals or institutions that are not mentioned in the manuscript but have made an important contribution to the study.

6. Table of Contents

- The heading for this page is **TABLE OF CONTENTS** in uppercase and bold attribute, centered without punctuation. (See attached SAMPLE: TABLE OF CONTENTS)
- The titles of chapters or sections must be listed and worded exactly as they appear in the manuscript.
- Titles for the preliminary pages and for all chapters, except sub-chapters, are in uppercase.
- The page number for the starting page of each part is listed flush at the right margin.
- Any space between the last word of the title and the page number can be filled with a dot leader.

7. List of Tables / Figures / Symbols/ Abbreviations

- The headings for these pages are in uppercase and bold attributes, centered without punctuation. (See attached SAMPLES)
- All tables and figures are arranged in increasing Arabic numeral.
- symbols and abbreviations are arranged alphabetically.
- Greek-lettered symbols are placed before Roman/English-lettered symbols
- Each acronym / symbol is indented and separated from the definition by a dash.
- Consistency in the inclusion of tables and figures must be observed; if tables from one chapter are included in the list, then tables from all the other chapters and the appendix must be included.
- Each entry must list the same caption or title used for a table/figure.

- The most common mode of presentation is to single-space within each entry and to double-space between entries.

B. Text

- Although the detailed organization of the text may vary according to the nature of the work, the formatting of the text must be followed consistently throughout.
- All headings and sub-headings should be presented in the same way in each chapter or major section, in terms of capitalization, placement on the page, and kind of typeface used.
- No headers or footers giving the titles of chapters, other sections, or the thesis are allowed.

1. Body of the Text

- The manuscript is organized into logical chapters and sections as may be shown below:

CHAPTER I	**INTRODUCTION**
CHAPTER II	**REVIEW OF RELATED LITERATURE**
CHAPTER III	**METHODOLOGY**
CHAPTER IV	**RESULTS AND DISCUSSIONS**
CHAPTER V	**CONCLUSION AND RECOMMENDATIONS**

- Numbering for each chapter is in Arabic numeral.

2. Chapters and Sections

- The heading for each chapter should be centered on the first line of the page without punctuation and printed 1.8" below the top of the page. On the third line is the title of the chapter.
- The section title starts on the fourth line below the title of the Chapter.
- The section heading is flush to the left margin.
- The first page of each chapter is counted, but unmarked. All other pages are marked at the upper right-hand margin, 1.25" below the top page, using Arabic numerals.
- All major chapters must begin on a new page; sections/sub-sections need not.
- Whenever the heading of a section or subsection appears near the bottom of a page, it must be followed by at least one line of text, or the heading should be forced to the top of the next page.
- Entries between sections/sub-sections are separated by a double space.

3. Tables and Figures

- Table designates tabulated numerical data used in the body of the manuscript and in the appendices. Figure designates all other non-verbal materials such

as illustrations, charts, graphs, maps, photographs, drawings, diagrams, and the like.

- All tables and figures should be located right after the text that is referring to it and, if possible, should be located such that they do not run over into the next page. If this happens, subsequent pages of the illustration must include at least the illustration number and the notation that it is continued, e.g., Table 1, contd.
- Illustrations may be presented horizontally or vertically. In either case, illustrations must fit within the required margins, and page numbers must be placed consistently throughout the entire manuscript.
- Table captions are typed with one blank line above the table and figure captions are typed with a blank line below the figure. If an illustration is rotated, the coordinating caption must also be rotated.
- For tables and figures copied from other sources, the caption of such should include the source.
- The captions for tables and figures must be identical with those used in the LIST OF TABLES and the LIST OF FIGURES in the preliminary pages.
- Illustrations must be numbered consecutively throughout the entire manuscript in a straight sequence (1, 2, 3, 4, etc.).
- Photographs, as a figure, must be scanned and converted to an electronic format for simultaneous printing with the page.
- Oversized illustrations should be reduced; however, legibility must be maintained. If this is not possible, a folded, oversized page may be included, which may be accordion-folded, so that it may be bound with the rest of the document. In this case, the page number must appear in a manner consistent with the rest of the document.
- Below is a sample of a table and a figure; note that the left and right border lines of the table are centered between the left and right margins.

Table 1. This is the title of the first table in Chapter 1. If the title is long such that it runs down the next line, the first word of the next line must be flush with that of the previous line as shown by this example.

	Column 1	Column 2	Column 2
Row 1			
Row 2			

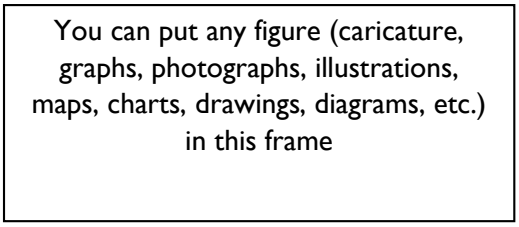

Figure 1. This is the title of the first figure of Chapter 1

C. Back Matters

1. Bibliography

- Theses must have a bibliography. This must be in the same font type and point size as the rest of the manuscript.
- Entries are listed alphabetically by the author's last name or by the title of the article/book if there is no author or editor given.
- The first line of each entry starts at the margin; the second and third lines are indented five spaces (one tab). (Format > Paragraph > Hanging indentation in Microsoft Word)
- Single-space each entry and leave a single space between entries.
- Use the latest publishing date for the book or encyclopedia and the complete date for newspapers, magazines or the Internet.
- See attached SAMPLE: BIBLIOGRAPHY which illustrates the correct setup including appropriate punctuation and underlining.

2. Appendix or Appendices

- The appendix provides a place for a supplementary material that is not necessary for inclusion in any of the chapters. Tables that are too detailed for the text presentation, figures, technical notes, raw data, computer programs, sample questionnaires, schedules, case studies are common appendix materials.
- Appendices, presented in alphabetical order (A , B , C , D , …), and may be single-spaced, appear at the end of the manuscript only; they do not appear at the end of each chapter.
- The font type and point size for the main heading, sub-headings, and illustration captions of an appendix must match that of the text, but the font type and point size of the materials in the body of the appendix may be different.

3. Curriculum Vitae

- This is a professional biography of the author that may include place and date of birth, educational institutions attended (starting from high school), degrees and honors awarded.
- It should be short, concise, written in the third person and in the same font type and point size as the rest of the manuscript.
- It must be double-spaced.

III. Technical Specifications

A. Paper Size and Quality

- 8 ½" × 11" short-sized (letter), white, substance-20 book papers must be used.

B. Paper Layout

- Paper must be printed in portrait mode. Landscape mode is not allowed except for purposes of accommodating unusually large tables, illustrations and the like.

C. Margins

- To provide allowance for trimmings during binding and later ease in microfilming and copying, every page of the manuscript must meet these minimum margin standards:

Top margin:	**1.8″ (note: pagination is at header 1.25″ from top of page)**
Bottom margin:	**1.25″**
Right margin:	**1.25″**
Left margin:	**1.75″ (binding edge)**

- All manuscript materials must fit within these margin requirements (including tables, figures and graphs).

D. Fonts and Font Size

- Any legible font, except script, italic or ornamental, is acceptable for the body of the text.
- A 12-point font size is recommended for Times New Roman; if Arial, Helvetica, or Century Gothic fonts are used, the manuscript must be 11- or 12-point font.
- A consistent font and size must be observed throughout the manuscript.
- Italics may be used for quotations and words in a foreign language.

E. Spacing

- The manuscript, including the abstract, acknowledgement, vita, must be double-spaced or one-and-one-half-spaced. This should be used consistently throughout the manuscript.

- Footnotes, endnotes, bibliographic entries, long quotations, items in lists, table of contents, and appendices may be single-spaced, i.e., if that style is recommended by the discipline.

F. Pagination

- Each page of the entire manuscript must be numbered except for the title page, and the approval sheet page.
- Preliminary pages are numbered consecutively in lower-cased Roman numerals; the first page to be numbered is the Abstract page which is marked iii.
- The text and back matters are numbered consecutively in Arabic numerals, beginning with 1 (unmarked) on the first page of the text.
- Page numbers must appear in the same location (upper right-hand corner 1.25" below the top edge and 1.25" from the right edge) on each page except on the first page of each Chapter where the page is counted but unmarked.
- Page numbers must be consistent with the text in font size and style.

G. Text Citations of References

- Citation practices differ among disciplines. Students should follow the practice most commonly used in their discipline.
- References may be cited by giving the last name(s) of the author(s) and the year of publication of the reference.

  Example …. was discovered (Longuet and Fox, 1977)

H. Equations

- Equations must be numbered consecutively from (1.1), (1.2) …, (2.1), (2.2) …, etc., up to the end of the paper, including any appendices. The equation number is used when referring to equations. The first number refers to the chapter; the second number refers to the nth occurrence of the equation within the chapter.

  Example:

$$D_{(uv)w} = \alpha_u dw,v + \alpha_v dw,v + \beta\, du,v + \tau ABS(dw,u - dw,v)$$

(3.1)

I. Corrections and Errata

- No correction in the form of correction tape or fluid, erasures, crash-out, and the like must be made on the final copy.

J. Printing

- All print should be letter quality with dark black characters that are consistently clear and dense.
- Dot matrix printing is not acceptable.
- Ink jet, laser jet or a similarly high-quality printer should be used.

K. Binding and Labeling

- The manuscript is bound using a HARD AND cover (soft bound), in dark blue color.
- The cover contains four blocks of words, viz., (1) the title (2) name of the authors, (3), department, college, university, place, and (4) date (month and year) of submission, all of which are stamped in gold foil.
- All the blocks are balanced within the page with block (1) occupying the first line(s) and block (4), the last line of the hard cover, applying the same margin settings as in the manuscript.
- Fourteen (14)-point Times New Roman font with bold attribute for all elements is used. (See attached SAMPLE: SOFT COVER)

APPENDICES

APPENDIX A: CONCEPT PAPER FORMAT

REPUBLIC OF THE PHILIPPINES
UNIVERSITY OF SCIENCE AND TECHNOLOGY OF SOUTHERN PHILIPPINES
Department of Information Technology
P-6, Mobod, Oroquieta City, Misamis Occidental 7207
Email Address: ustporoquieta.bsit@ustp.edu.ph

UNIVERSITY VISION

A nationally-recognized S&T University providing the vital link between education and the economy.

UNIVERSITY MISSION

Bring the world of work (industry) into the actual higher education and training or students. Offer entrepreneurs the opportunities to maximize their business potentials through a gamut of services from product conceptualization to commercialization; Contribute significantly to the National Development Goals of food security and safety; and energy sufficiency and security through technology solutions.

QUALITY POLICY

We are committed to provide our primary customers with excellent and continually improved quality human resources and services that comply with statutory and regulatory requirements in seeking to attain sustainable development and inclusive economic growth as a nationally-recognized university of science and technology.

TITLE

- ✓ *Must give an overall picture of study.*
- ✓ *Contains the technology used to make the study better.*

Background of the Study

- ✓ *A narrative of how the study was formulated.*
- ✓ *All cited articles/studies should be properly acknowledged.*
- ✓ *Present in a deductive method that is, starting from general knowledge down to specific knowledge.*
- ✓ *State the existing technology that is being used.*
- ✓ *Narrate the technology that is proposed and its advantages over the existing ones.*

Statement of the Problem

- ✓ *State clearly the problem/s the needs to be addressed in the study.*

Comparison of Related Systems

- ✓ *Present in a tabular form the related studies along with its features.*

TITLE	FEATURE 1	FEATURE 2	FEATURE 3	FEATURE N
STUDY 1				
STUDY 2				
STUDY 3				
STUDY N				
YOUR STUDY				

Proposed Solution

- ✓ *State the process on how the problems stated will be addressed.*
- ✓ *Present a system architecture on how it is to be implemented.*
- ✓ *Discuss the technologies to be used and how it will be used in the study.*

Self and Peer Evaluation of Capstone Project and Research Subject

Please assess the work of you and your team members by using the following criteria. Your feedback will be considered in assigning the grade for the project (20% of your grading). Please try to be as honest and fair as possible in your assessment.

5 Excellent work; was crucial component to group's success
4 Very strong work; contributed significantly to group
3 Sufficient effort; contributed adequately to group
2 Insufficient effort; met minimal standards of group
1 Little or weak effort; was detrimental to group

SELF Evaluation
Name: _____

_____ Participation in developing ideas and planning project
_____ Willingness to discuss the ideas of others
_____ Cooperation with other group members
_____ Interest and enthusiasm in project
_____ Participation in leading/ facilitating discussion
_____ Ease and familiarity with discussion material

PEER Evaluation
Member 1: _____

_____ Participation in developing ideas and planning project
_____ Willingness to discuss the ideas of others
_____ Cooperation with other group members
_____ Interest and enthusiasm in project
_____ Participation in leading/ facilitating discussion
_____ Ease and familiarity with discussion material

PEER Evaluation
Member 2: _____

_____ Participation in developing ideas and planning project
_____ Willingness to discuss the ideas of others
_____ Cooperation with other group members
_____ Interest and enthusiasm in project
_____ Participation in leading/ facilitating discussion
_____ Ease and familiarity with discussion material

PEER Evaluation
Member 3: _____

_____ Participation in developing ideas and planning project
_____ Willingness to discuss the ideas of others
_____ Cooperation with other group members
_____ Interest and enthusiasm in project
_____ Participation in leading/ facilitating discussion
_____ Ease and familiarity with discussion material

SELF-REFLECTION

What did you learn from the experience?

What do you think went well?

What would you have done differently, given the opportunity?

Do you have any other comments or suggestions about the project?
